NEW LIQUID COOLED DEUTZ ENGINE WITH DRUM D807 BLOWER

- All-in-one, Self-Contained unit. You can mount it on a silo, bolt it to a utility trailer, or move this unit with a forklift by using the built in pallet fork system. Versatility is king!
- Built with a Deutz Td2.9 L4 Diesel engine with 74HP and up to 2600RPMs. This unit has an adjustable position, automatic start, and a full digital display. The most convenient set-up industry wide!
- Custom built gas tank in the frame. This one-of-a-kind build reduces the footprint of the unit and makes for the best design in the industry.
- Built with the Drum D807 blower, the most versatile blower available. Temperature and noise reduction and backed by Gardner Denver, the best support in the industry.
- Proudly manufactured in Kansas City, KS.

The Drum D807 is a diamond ported, positive displacement blower, industry proven, tried and true for over 30 years.

Corporate Headquarters :: Kraft Tank Corporation, 320 Kindleberger Rd, Kansas City, KS 66115
